# *The Jeraco Advantage*

**1. Unfilled Resin** - Jeraco is the ONLY North American truck cap manufacturer to use unfilled resin in our products. This allows our caps to be lighter, stronger and more resistant to average wear and tear than our competitors. Other truck cap manufacturers add up to 45% crushed limestone to their resin cutting costs but sacrificing strength and making their caps more brittle.

**2. Reinforced Roof** - A standard feature with all of our caps and lids is a 5/8" thick honey-combed roof insert. Not only is this thicker than any other manufacturers roof but during the manufacturing process our roof's soak up more resin for additional strength.

**3. Reinforced Base Rail** - Another standard feature with all of our caps, our base rails feature an encapsulated inner reinforcement that is unequalled for strength and durability.

**4. Factory Finished Side Edges**- Unlike other brands of truck caps we take the extra step of giving you a finished bottom edge instead of a piece of trim intended to hide defects.

**5. Reinforced Fiberglass Structure** - When we're building your cap our technicians hand lay fiberglass reinforcements in high stress areas insuring that you will be able to enjoy your Jeraco truck cap for many years to come.

**6. Rubber Mounted Radius Side Windows**- We install the windows of your cap with a heavy duty automotive locking window rubber that is specially formulated to resist weathering. This helps to vastly reduce leaks while maintaining the ability to quickly replace a window or a torn screen should you ever find the need to replace either. Should you prefer, screw-in style side windows are available upon request. Supreme Series caps and radius side access doors are only available with screw-in style windows.

**7. Fully Riveted Rear Doors** - All radius rear doors used by Jeraco are fastened with rivets on the outside and screws on the inside of the cap which ensures a snug fit and vastly reduces any leaks.

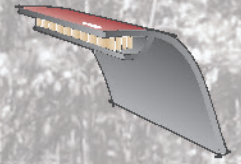

**8. Dual Lock Rear Doors** - Standard on our Cab-High, Mid-Rise & High-Rise caps these radius rear doors better conform to the curved style tailgates now used on most trucks than the single lock style doors that other companies use.

**9. Dedication To Quality** - For nearly 40 years Jeraco Enterprises has been manufacturing the highest-quality truck caps available. We believe that our customers deserve the best which is exactly why we use many unique manufacturing processes and only use quality components that not only meet but surpass industry standards. We are also proud to offer to our customers a Lifetime Limited Warranty on our products.
