*For nearly 40 years Jeraco Enterprises has been manufacturing the highest-quality truck caps available. Our manufacturing processes and only use quality components that not only meet but surpass industry standards.*

*Unfilled Resin - Jeraco is the ONLY North American truck cap manufacturer to use unfilled resin in our products. This allows our caps to be lighter, stronger and more resistant to average wear and tear than our competitors. Other truck cap manufacturers add up to 45% crushed limestone to their resin, cutting costs but sacrificing strength and making their caps more brittle.*

*Reinforced Roof - A 5/8" thick honey-combed roof insert is a standard feature with all of our caps and lids. Not only is this thicker than any other manufacturers roof but during the manufacturing process our roofs absorb resin for additional strength.*

*Reinforced Base Rail - Another standard feature with all of our caps, our base rails feature an encapsulated inner reinforcement that is unequalled for strength and durability.*

*able. We believe that our customers deserve the best which is exactly why we use many unique manufac-  
s. We are also proud to offer to our customers a Lifetime Limited Warranty on our Fiberglass products.*

*Rubber Mounted Radius Side Windows - We install the windows of your cap with a heavy duty automo-  
tive locking window rubber that is specially formulated to resist weathering. This helps to vastly  
reduce leaks while maintaining the ability to quickly replace a window or a torn screen should you ever  
find the need to replace either. Should you prefer, screw-in style side windows are available upon  
request. Supreme Series caps and radius side access doors are only available with screw-in style win-  
dows.*

*Fully Riveted Rear Doors - All radius rear doors used by Jeraco are fastened with rivets on the outside  
and screws on the inside of the cap which ensures a snug fit and better stands up to years of use.*

*Dual Lock Rear Doors - Standard on our Cab-High, Mid-Rise & High-Rise caps these radius rear doors  
better conform to the curved style tailgates now used on most trucks than the single lock style doors  
that other companies use.*

# *Sport Lid Series*

6.5' TUNDRA DOUBLE CAB

6.5' SILVERADO DOUBLE CAB

5.8' SIERRA CREW CAB

*Constructed to the same high standards as our fiberglass truck caps, these stylish tonneau covers are custom designed by hand to fit your truck. Key features include a Jeraco exclusive painted handle for easy opening, a locking rod latch system that is many times more durable than cable latching systems and lift assist arms that allow you to easily open and close your Sport Lid.*
